SKILLS

Frontend : React.js , Next.js , Tailwind CSS

Backend : Python , FastAPI , supabase

AI Integration: OpenAI API, LangChain, Hugging Face, personalised Agents, Vector Database

DevOps : Docker, GitHub Actions, Vercel

Languages: TypeScript, JavaScript, Python, SQL

PERSONAL PROJECTS

AI Receipt Scanner SAAS

ABuilt a SaaS-based AI receipt scanner that automates expense tracking by extracting and structuring data Powered by OpenAI and LLM workflow.

React , Nextjs , Clerk Authentication, Inngest , Convex, Schematic , Stripe , OpenAI API

[Github Repo](#) | [Website Demo](#)

September 2025 - Present

AI Email Finder App

Developed an AI email discovery tool leveraging vector embeddings and semantic similarity search to accurately retrieve targeted contact data.

React 19 , Nextjs , Vector Embeddings , Supabase , HuggingFace API

[Github Link](#) | [Website Demo](#)

November 2025-

AI Powered Report Generator

Built an AI-powered Report generator , takes your raw ideas or notes images and creates structured and precise reports for you and stores them securely in the Database.

React 19 , Nextjs , Gemini API , Cursor , Supabase

[Github Repo](#) | [Website Demo](#)

Dec 2024-

EDUCATION & QUALIFICATION

B Tech in Computer Science

Gurunanak Dev University Amritsar

3rd Year

CGPA : 8.2

Certifications

-Generative Ai fundamentals by Google Cloud

-Ai integrated Web Development Udemy

-Full Python Crash Course Udemy

-LLM Basics programming with Mosh

Experience

Developed Full-Stack — AI Receipt Scanner SaaS | Sep 2025 – Present

Tech Stack: Next.js, FastAPI, OpenAI, Convex , Inngest

• **Built a vector DB-based AI Email Finder** using vector Embeddings to increase accuracy using Supabase

• **Deployed a scalable vector database system** to improve search accuracy by **40%**.
