SUMMARY

Full-stack developer crafting scalable web applications with Next.js and Django, integrating AI-driven features to deliver production-ready solutions with seamless UX, secure authentication, and optimized performance while transforming real-world ideas into impactful digital products

EXPERIENCE

Freelance Web Developer

Jan 2026 - Present

- Engineered and launched a full-stack e-commerce platform, attracting 1,500+ users in initial weeks and expanding digital reach
- Designed a secure and scalable backend system with optimized APIs, efficient database queries, and robust data handling to support growing user demand.
- Secure admin dashboard with role-based access and streamlined product management, enabling safer and more efficient business operations
- Achieved 20–30% sales growth, with orders rising from ~40 to 55+ per month

PERSONAL PROJECTS

Jobify | React, Next.js, Django, DRF, SQL | [demo](#)

Personal - Jan 2026

- Built a full-stack job portal that enables employers to post roles and candidates to search and apply through a secure, role-based system, streamlining the hiring workflow and reducing manual job management effort by ~60%.
- Implemented real-time job search, authentication, and protected APIs with an access-controlled backend, ensuring data security and reliable performance while supporting 30+ active users.

ReportMaker AI | React, Next.js, Supabase, Gemini | [demo](#)

Personal - Nov 2025

- Leveraged AI-driven analysis to generate precise expense summaries and actionable insights, enhancing financial tracking accuracy and operational efficiency.
- Established secure data handling practices that integrated with existing systems, leading to the creation of a centralized access dashboard now utilized by 50+ personnel, enhancing oversight of sensitive financial information.

DOC ANALYZER SAAS | React, Next.js, Tailwind, Inngest | [demo](#)

Personal - May 2025

- Architected a smart receipt management SaaS that extracts and categorizes expense data, reducing manual bookkeeping by ~80%
- Utilized AI-driven analysis to generate accurate summaries and improve financial tracking efficiency
- Built a scalable system currently supporting 50+ concurrent users with stable performance

TECHNICAL SKILLS

- Frontend:** HTML5, CSS3, JavaScript, TypeScript, React, Next.js, Tailwind CSS.
- Backend:** Python, Django, Django REST Framework, SQL, PostgreSQL, LLM API Integration.
- Tools & Deployment:** Git, GitHub, Vercel, Render, Supabase.

EDUCATION

Btech in Computer Science Engineering, 3rd year from Guru nanak Dev University Asr.

CGPA:8.1/10 (Current)

Session 2023 - 2027
